BIOGRAPHY

Sera Nox is a Belgian DJ with Dutch and Southern Italian roots, based in the warm south of Limburg, just a few kilometres from the picturesque city of Maastricht. A '90's baby', raised on electronic music with both parents sharing a deep love for rich grooves, strong basslines, and timeless tracks. This passion, passed on from an early age, naturally shaped a deep connection to the powerful driving beats of Techno and the groovy rhythm-driven beats of Tech House.

THE RIGHT VIBE

Sets are built with strong technical control combined with intense emotional depth, taking the crowd on a journey and making them feel the energy. Each track is a building block toward a larger whole, gradually raising the energy to a climax. Like riding a rollercoaster: breakdowns and build-ups carry you to the top, and the drops hit with full force. Each set is dedicated to one genre. Techno sets explore deep, driving, dark, minimal, and peak-time acid grooves — stripped-back and hypnotic, yet full of energy and emotion. Tech House sets are long, soulful, and rhythm-driven, focusing on sensual, body-driven energy with rolling funky basslines and subtle soulful vocals. Rooted in the underground, performances suit clubs, warehouse nights, festivals, and intimate events — always crafting the right vibe.
